I am a personable and astute university graduate with proven independent and collaborative skills that I have developed through my university studies and past and current work experience. I am keen and enthusiastic to work as a contributing member of the team, which I have also exemplified in my experience effectively leading a team. I am eager to apply my consolidated skills, work ethic and discipline to opportunities where I can grow, learn and develop in a rich learning environment. I completed my bachelor's degree in Accounting and Finance in December of 2018, where I then took a break for a year to work full time and explore future career pathway.

Now that I have developed a solid foundation of software development skills, I can offer a determined and ambitious attitude into all potential employers. It is a professional and personal goal of mine is to continuously be adding to my own knowledge base and professional skillset from my experiences at and outside of a professional setting, letting my personal passion for coding and discipline at work mesh into each other to greater flourish.

Education

Kedron State High School

Graduated 2014

Australian Catholic University (Bachelor of Accounting and Finance)

2015-2018

University of Sydney (Full Stack course flex part time)

Feb 2022-Aug 2022

Personal attributes

- **Self-Motivated:** Motivated to strive and achieve based on principle and enthusiasm.
- **Customer Service:** Skilled in communicating and servicing customers from all backgrounds.
- **Honest and Reliable:** Strong morals and ethics ensuring honesty, reliability and ability to responsibly undertake tasks.
- **Effective Communicator:** Utilize communication in a team environment to effectively complete and delegate tasks collaboratively.
- **Initiative:** Ability to recognise and execute initiative by prioritizing tasks and keeping self accountable by setting daily goals and maintaining organisation.

Technical Skills

Comprehensive knowledge of HTML5, CSS and JavaScript. Studied frameworks or libraries include bootstrap and jQuery. Comfortable using and implementing third party and server-side API's. Skills being learnt in the next four months include node.JS, express.JS, react.JS, SQL MongoDB and State programming.

Web Development Projects

Holy Spiritz is a web application created for a group assignment that I did, it takes data from two separate API's and gives you a cocktail with relevant ingredients and instructions on how to make it along with a gif related to the drink name. This project uses HTML and CSS with a tailwind framework. It also includes a lot of JavaScript and some jQuery used in the fetch functions. Holy Spiritz is deployed at https://jemimasiddiqui.github.io/Project_1_Group-B/

I created a responsive weather dashboard webpage where any city in the world can be searched and you will see the current weather conditions and also the conditions for the next five days to help you make plans. This web app is deployed at <https://andrewgavegan.github.io/Weather-Dashboard/>

I have also created a web application that is used as a daily work diary. It utilizes HTML, CSS and JavaScript, as well as jQuery and Moment.JS to sync the responsive display with the time of the day. This web app lets you set reminders for the day ahead and clear them once they are done. It is color coordinated with the past, current or future hours of the day. This app is live at <https://github.com/AndrewGavegan/Work-Diary>

Employment History

Raw Juicery Chermside – Casual Position

August 2015 – May 2016

Woolworths Northwest Plaza – Grocery Department

September 2016 – January 2020

At Woolworths, I have become a valued, loyal member of the team. I am entrusted with a range of tasks and responsibilities, most of which are managerial in nature. For example, I lead a night fill team of 5 employees once a week where I delegate tasks and work myself to effectively and successfully contribute to the upkeep of the store.

- Primary roles included store routine continuity, customer relations and the upholding of the inventory cycles. Working always on a schedule with minimum flexibility. Routinely entrusted with the supervision of colleagues in a team unit or one on one. Entrusted with evening and after hours supervision of the store and team members within, handling of the store safe, store keys and alarm codes. Handling customer enquires of varying difficulty. Operating stacking equipment, unloading trucks and signing delivery receipts on the majority of shifts. Understands processes of Woolworths and its suppliers. Understands the planogram process and item ranging processes.

Strikeforce AMC
June 2020 – Present

Working at Strikeforce as a merchandising representative I have gained a plethora of new skills to bring to the workplace. Working in the field primarily by myself and only liaising with superiors via phone and email, I have gained a more trusted and deeper sense of responsibility based on personal values and not something else such as a fear of punishment. Completing work in various Woolworths and Coles supermarkets on behalf of Strikeforce, I have honed my skills liaising with new people in new places nearly every single day while representing my company in the field.

- Primary roles include liaising with store contact, discussing the days required layout or job, completing work and then getting it checked by the store. Most of my work involves completing store Planograms or layouts while infrequently installing merchandising material on behalf of other brands. Have been tasked with leading a team of colleagues in a night shift setting completing large store changes overnight with a team of 4 or 5 people.
